

Robotics at Barton Next Year!

First Lego League (FLL) teaches children real world engineering challenges, basic programming skills and team building through Lego-based robotics.

A grass roots effort by Barton families and a local company last fall resulted in this fun, educational experience for 24 Barton students and their parent coaches. They are excited to collaborate with Barton Community Education next year to bring this engaging opportunity to more Barton students.

The number of student openings is limited, so please look for an informational table, as well as registration opportunities at the August 13th "Get Connected" day. More information will also be posted on Face Book this summer.

In the meantime, learn more about First Lego League at <http://www.firstlegoleague.org/parents> or contact Andie Thomas at andrien.thomas@devjam.com, 612-387-1472
