

3/9/17

Dear mom Lukas

In school volunteers from Junior Achievement came. They came last year too so you might know a little bit about them. They brought a big piece of paper like thing and some little paper buildings. The paper thing was split into different zones and each zone meant something so we would have an organized city. We put together our buildings and placed them in the correct place to and got an organized city.

Were learning about Iditarod in school. The story of the race starts like this. There was this bad sickness and a cure for the sickness was about 1,200 miles away. It was winter and the only way to get there was sled dogs. It took about 30 days to get to the cure by sled dogs. They had to do it in 15 days. The person that got the serum did the whole trip in 5 days 7 hours and 30 minutes. So the race now is mostly about the history. It's also the last great →

face.

Mom I hope you like this pink paper that I'm writing on. I picked this paper because I know you like pink.

Love Lukas and the Pink Paper
