

Dear mom and dad.

We went to River ~~to~~ Rendezvous last week. I of my favorite things was the painter's class. He talked about what paint is made out of. Paint can be made out of. It can be made out of dirt, rocks, or other things.

Another thing we did at River Rendezvous was log cabin making. The person helped us take apart a 3x3 ft mini dog exhibit but we had to put it together by our selves. If we made a mistake he simply said "you have a problem".

We started National Geographic this week. The article was called LESSONS IN LAVA. It's about 2 scientists and their team that study volcanoes. One of the scientists went dangerously close to the lava to get a sample.
